

Save Irish Food & Farmers

All info here is verifiable check freedomtruthpeaceireland.com

Pushed into expensive industrial and chemical farming, farmers, now in debt are being unfairly penalised.

The Irish government push the agenda of big corporations, that use a fake 'Green Agenda' (including the bogus man-made climate change agenda), meanwhile ignoring and blocking creative solutions offered by scientists and farmers. The plan is to force out Irish farmers replacing them with big industrial farms, insects, lab-made meat/milk/eggs, and factory grown food.

What Will the War on Farmers & Food Mean for Irish people

- ❖ Our unique rural Irish society, culture and businesses ruined.
- ❖ Money going to global corporations not local areas.
- ❖ 80% of people controlled in large urban centres, food produced in huge labs/industrial farms/factories.
- ❖ Nutritionally empty, highly processed food full of toxins/fertilisers/pesticides and INSECTS
- ❖ Soil health/ecology and human health devastated.
- ❖ The destruction of Irish Fishing will continue.

What Can You Do

- ❖ Resist the treaty giving the World Health Organisation (WHO) power to decide and enforce Irish Agricultural Policies (for climate health etc.)
- ❖ Join the Farmers Alliance, Support Farmers & Lobby politicians.
- ❖ Unite Against Globalisation. Buy local & Irish food, straight from farms and markets if possible. Spend cash
- ❖ Ask why farming not industry is held responsible for ecological damage.
- ❖ Ask about the huge ecological footprint from lab-made & imported food, peat & insect factories.
- ❖ Research the bogus man-made climate change agenda.

Food production is our most vital use of land. The way forward is land regeneration, creative farming, and small biodiverse farms. A country unable to feed itself risks FAMINE.

The United Nations (UN) & The World Economic Forum (WEF)

The UN & WEF are unelected bodies mostly funded by private corporations

The **UN & WEF 2021 UN Food Summit** was boycotted by 70% of small farmers for only representing corporate interests. The **WEF** a private exclusive club representing big corporations, (causing most of the world's ecological damage), pretend to offer Green Solutions but really only benefit members while increasing Power, Profit and Control. The **WEF** groom politicians and boast of infiltrating most governments (treason is putting another agenda before that of your own country). The **WEF** predict that by 2030 'You will own Nothing and be Happy' this will happen under a regime of total surveillance and control. The elite will of course own everything. The EU/UK/USA etc are already introducing these control systems.

- 1-Increase the viability of rural produce.
- 2-Raise awareness around quality food production and supply.
- 3-Challenging EU policies and regulations.
- 4-Proactively support and protect property and landowners.
- 5-Challenge the measurement of CO2 and Methane on Irish environment.
- 6-32 County approach.
- 7- European and Global alliance with like-minded organisations.
- 8-Facilitating the establishment of a Farmer-Consumer Political Party.

This new Irish organisation (launched on 16 April 2023) will represent farmers in a robust and no-nonsense manner. Many believe that

existing farmer organisations have not only failed but actually betrayed Irish Farmers by slavishly following government dictates with unjust and unfair penalties. The Farmers Alliance will be a standalone outfit representing the Irish farmers, rural people and consumers. They will expose the bogus science of man-made climate change which has been manipulated to fit an agenda. They will work to reduce costs, increase the price of products and increase direct sales to consumers. They intend to establish nationwide co-operatives and use all existing farm outlets and distributors to import and disperse goods. The Irish Farmers Alliance has taken upon itself a mantle of supreme responsibility for the survival of Irish farming and securing of the food chain. Their strength will lie in unity within Ireland and with European farmers.

United We the Farmers and People are the 99%
We Can Save Our Beautiful Country
